Reviews

Definitely one of the better publication I have got possibly read. It really is writter in basic phrases and not difficult to understand. You wont sense monotony at anytime of your respective time (that's what catalogs are for about if you request me).

It will be readily appreciated that it is not possible to mention even the names of the many individuals who have contributed in varying degrees to the success of the Congress, still less to give to each the proper credit for services rendered, and no attempt has been made to do so. While the bulk of the work of the Congress has naturally fallen upon the members of the Committee of Management, they have been greatly assisted by many engineers and others outside of its membership, both in this country and abroad, and the Committee takes this opportunity of expressing to all such, as well as to the contributors of papers and discussions, its appreciation of and thanks for the aid and support which they have generously given to the undertaking.
