Lippincott Williams&Wilki Okt 2011, 2011. Taschenbuch. Book Condition: Neu. 239x156x15 mm. Neuware - This text is part of the Color Atlas and Synopsis of Clinical Ophthalmology which was developed at Philadelphia's famed Wills Eye Institute. The beauty of this series is the powerful combination of illustrative photographs and a summary approach to the text. While the seven ophthalmic subspecialties in this series, Cornea, Retina, Glaucoma, Oculoplastics, Neuroophthalmology, Pediatrics, and Uveiti, employ varying levels of visual recognition, a relatively standard format for the text is used for all volumes. The goal of the series is to provide an up-to-date clinical overview of the major areas of ophthalmology for students, residents, and practitioners in all the healthcare professions. This book is intended to provide comprehensive ophthalmologists, ophthalmology residents, and retina and cornea fellows with a single-volume, easily accessible resource covering all the major aspects of ocular inflammatory disease. It will also be useful for subspecialists who are looking for an up-to-date, concise review of the field. The book features more than 450 4-color illustrations throughout and a short, succinct format which includes: Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management. 336 pp. Englisch.
