## Diffraction Theory: A Critique of Some Recent Developments (Classic Reprint)

By C J Bouwkamp

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Diffraction Theory: A Critique of Some Recent Developments During the fall semester of the academic year 1952-1953 Dr. C. J. Bouwkamp of the Philips Research Laboratories, Eindhoven, Netherlands served as a member of the Washington Square College Mathematics Research Group of New York University, Dr. Bouwkamp is, of course, well known for his research in electromagnetic theory and related fields. In recent months Dr. Bouwkamp has been surveying and assessing the literature on the subject of diffraction. The present report concentrates on papers related to the subject of diffraction by apertures. However, the report does not merely relate the efforts of numerous authors, but, where necessary, criticizes, emends, and pursues the consequences of their work. This study of the problem of diffraction illustrates very clearly the need for mathematical accuracy in the formulation and solution of physical problems. Because the diffraction problem is a difficult one, many authors have made plausible physical assumptions which simplify the procedure. Others have introduced reasonable mathematical approximations at some stage of their work. However, further mathematical analysis has shown...
