

The Potentials About a Point Electrode and Apparent Resistivity Curves for a Two-, Three-, and Four-Layer Earth Minnesota Archive Editions

By Harold M. Mooney

Univ Of Minnesota Press. Paperback. Book Condition: New. Paperback. 264 pages. Dimensions: 9.3in. x 6.1in. x 1.3in. The Potentials About a Point Electrode and Apparent Resistivity Curves for a Two-, Three-, and Four-Layer Earth was first published in 1956. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. This publication will be useful to geophysicists, geologists, and others engaged in exploration for minerals by electrical methods, and may be used in theoretical studies of electrical prospecting. It makes available for the first time a comprehensive collection of 2268 master resistivity curves for a two-, three-, and four-layer earth. All previous collections of curves for Wenner electrode configuration are included, so the user will not need to refer elsewhere to complete his set of working curves. In addition, the basic potential data used in computing the curves is given in tables. Auxiliary tables are provided to reduce the graphic integration procedures to simple arithmetic. The integral in question occurs widely in solutions to Laplace's equation. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

An extremely wonderful book with lucid and perfect information. It is one of the most awesome publications I have read. Your life period will probably be enhanced the instant you start looking at this pdf.

-- Prof. Dan Windler MD

It is really an amazing publication I actually have at any time read. It is really simplistic but unexpected situations inside the 50 percent of your pdf. It's been written in an exceptionally simple way in fact it is just right after I finished reading this ebook where it actually transformed me, altered the way I really believe.

-- Dr. Celestino Spinka III
