

Laboratory Manual and Principles of Chemistry for Beginners

By George Mann Richardson

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . the same regardless of the chemical changes that take place. This fact renders it possible to express chemical changes in the form of an equation. All the substances taking part in a given chemical change are written in the first member of the equation, and all the substances resulting from the change are written in the second member of the equation; each substance being separated from the others by the sign of addition (+), and the two sides of the equation connected by the sign of equality (=). The total amount of each element and the total amount of material must be the same on the two sides of the equation. A very simple equation is that representing the decomposition of water by electricity shown in Exp. 26. $H_2O = 2H + O$. (1) The formation of water from its elements, as...
