

Los Alamos National Laboratory and Lawrence Livermore National Laboratory Plutonium Sustainment Monthly Program Report, April 2012

By Los Alamos National Laboratory

CreateSpace Independent Publishing Platform. Paperback.

Book Condition: New. This item is printed on demand.

Paperback. 24 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. In April

of 2012 the Plutonium Sustainment program at LANL

completed or addressed the following high-level activities: 1)

Construction activities on the Low Voltage Electron Beam

(LVEB) Welder and Analytical Chemistry gloveboxes have

started, successfully closing out MRT L2 Milestone 4195; 2)

Completed installation of the Surface Preparation unit in PF4.

The unit will be functionally tested in May; 3) Completed casting

of the first two near net shape W87 hemishells; 4) Delivered

Revision 3 of the Plutonium Sustainment and Manufacturing

Study; 5) Completed machining and inspecting the first set of

Pollux parts on Precitech 1; 6) Attended the Pu Sustainment

Second Quarter Mid-Year Review and the Pit Production

Integrated Project Team meeting in Livermore, providing

technical updates across the Plutonium Sustainment portfolio;

7) Analyzed the program impact of the LANL Voluntary

Separation Program. The analysis determined an impact of 24.

6 FTEs and a budget impact of approximately 3.2 Million

Dollars of pull back; 8) The Power Supply Assembly Area

project received a LANL Pollution Prevention Gold award in the

category of Cradle-to-Cradle Cleanouts. A gold...
